

Get more from your web meetings with integrated audio.

Create a fuller, more productive experience using integrated Cisco WebEx Audio with Cisco WebEx meeting solutions. Select the right audio option for each session, according to your requirements and budget. Streamline your meeting and billing processes by using just one vendor. It's easy to make your meetings a success with WebEx.

Make it easier to schedule and join meetings—and control audio from within the session.

Choose the right audio options for your needs.

Connect attendees with the right audio service for each session. Improve business efficiency using Integrated Teleconferencing to connect up to 500 callers. Set up your session with easy-to-use options, including global callback and toll services. Get WebEx audio for a single monthly fee. Use WebEx Audio to schedule teleconferences that you schedule ahead, or start on-the-fly with your Personal Conference Number—from any phone.

Keep your meetings productive and private.

Gain better control over team productivity. Identify who's speaking in a web meeting with Active Talker indicators. Manage call activity with line muting, easy attendee adding and more. Determine who attends and who doesn't by using attendance controls, participant lists and meeting lockouts.

Improve efficiency using a unified solution.

Trust WebEx Audio for all your audio services. Offer hosts and attendees a single point of entry to each web meeting. No more separate phone calls or emails to add audio. One invite, one login. Count on WebEx Audio to handle all your support needs too. Eliminate spending for numerous—even overlapping—services from multiple vendors. Save the time you would have spent reconciling the related bills each month.

Compatible with:

- Cisco WebEx Meeting Center
- Cisco WebEx Event Center
- Cisco WebEx Training Center

Optimize your meeting experience with powerful, flexible integrated audio features.

In-Meeting Controls

See a unified participant list within the meeting environment. Reduce disruptions and maintain meeting focus by muting or un-muting everyone or specific individuals.

Active Talker

Easily identify the current speaker by a flashing phone icon.

Call Back

Rely on WebEx Audio to call attendees and bring them into your audio conference—no hassling with meeting or attendee codes.

Microsoft Outlook™ Integration

Use Microsoft Outlook, Lotus Notes, and other popular scheduling application to set up both web and audio-only meetings.

Personal Conference Number

Set up an access code to host meetings with integrated audio from any phone—scheduled or on the fly.

Invite by Phone

Call late attendees or subject matter experts directly into your meeting when you need them.

Meeting Lock

Prevent unauthorized access to your audio conferences as well as your web meetings.

Unified Scheduling

Set up both web and audio for your meetings at the same time.

Integrated Billing

Eliminate the headaches and hassles of reconciling multiple bills.

On-Demand Access

Get 24x7 access to web and audio-only meetings, instantly—no reservation or cancellation approvals.

Global Access

Conduct meetings with audio, reaching anyone, anywhere in the world.

500-Caller Capacity

Conduct small and large collaborative meetings.

WebEx Customer Service and Technical Support

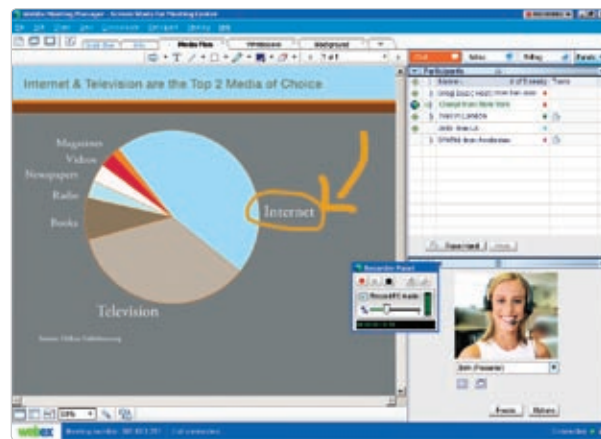

Enjoy one-stop access to web and audio meeting support. Eliminate the need to manage multiple vendors.

Multiple Audio Options

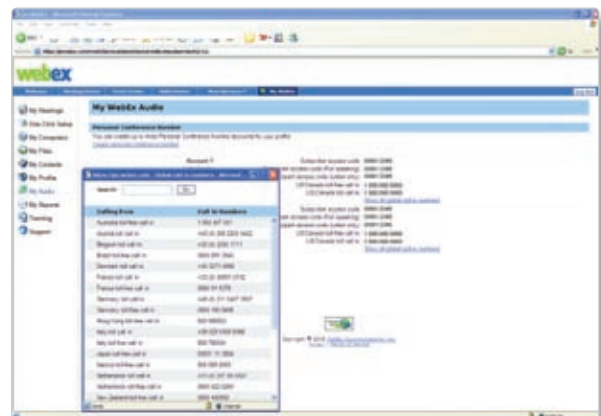

Meet your audio needs by selecting from: toll, global toll-free, and callback.

Invitee Authentication

Eliminate cumbersome login procedures with automatic authentication of meeting attendees when they call in.

See and control audio activity from within the meeting environment with integrated audio.

Hold ad-hoc audio-only meetings, using an existing Personal Conference Number.

Languages supported:

English, Spanish, Brazilian Portuguese, French, German, Swedish, Japanese, Chinese (Simplified and Traditional), and Korean.
